

JOIN THE DEBATE

The **Joint Market Surveillance Action 2016 (JA2016)** on GPSD products is a pan-European project co-funded by the European Union (EU) that focuses on consolidating and enhancing product safety through effective market surveillance across the European Economic Area (EEA).

The primary objective of the Joint Action 2016 is to further develop the conditions needed for the Member States to cooperate successfully on market surveillance activities. These actions aim to foster Best Practices Guidelines among national authorities and to ensure a broader dissemination of the results and a greater impact.
